

Unit 22 / Hunting

(See Unit 22 Seward Peninsula map)

Unit 22 consists of Bering Sea, Norton Sound, Bering Strait, Chukchi Sea, and Kotzebue Sound drainages from (but excluding) the Pastolik River drainage in southern Norton Sound, to (but excluding) the Goodhope River drainage in Southern Kotzebue Sound; and all adjacent islands in the Bering Sea between the mouths of the Goodhope and Pastolik rivers.

Unit 22A consists of Norton Sound drainages from (but excluding) the Pastolik River drainage to (and including) the Ungalik River drainage; and Stuart and Besboro islands.

Unit 22B consists of Norton Sound drainages from, but excluding, the Ungalik River drainage to, and including, the Topkok Creek drainage.

Unit 22C consists of Norton Sound and Bering Sea drainages from (but excluding) the Topkok Creek drainage to (and including) the Tisuk River drainage; and King and Sledge islands.

Unit 22D consists of that portion of Unit 22 draining into the Bering Sea north of (but excluding) the Tisuk River to (and including) Cape York and St. Lawrence Island.

Unit 22E consists of the Bering Sea, Bering Strait, Chukchi Sea, and Kotzebue Sound drainages from Cape York to (but excluding) the Goodhope River drainage, including Little Diomed Island and Fairway Rock.

Special Provisions:

- You may hunt brown bear by State registration permit in lieu of a resident tag in Unit 22, except in Unit 22C, if you have a State registration permit prior to hunting. Aircraft may not be used in any manner for brown bear hunting under the authority of a brown bear State registration permit, including transportation of hunters, bear, or parts of bear; however, this does not apply to transportation of bear hunters or bear parts by regularly scheduled flights to and between communities by carriers that normally provide scheduled service to this area, nor does it apply to transportation of aircraft to or between publicly owned airports. See page 23 for bear sealing requirements.
- A snowmachine may be used to position a hunter to select individual caribou for harvest, provided that the animal is not shot from a moving snowmachine.
- **National Park Service (NPS) areas**—For subsistence use, national parks and monuments are open only to NPS qualified subsistence users. Subsistence users must be local rural residents of NPS areas. For more information, contact the NPS office in Anchorage at (907) 644-3509.
- The taking of one bull moose and one muskox by the community of Wales is allowed for the celebration of the Kingikmuit Dance Festival under the terms of a Federal registration permit issued by the Bering Land Bridge National Park Superintendent. Permits will be issued to individuals only at the request of the Native Village of Wales. The harvest may only occur between Jan. 1–Mar. 15 in Unit 22E for bull moose and in Unit 22E for muskox. The harvest will count against any established quota for the area.
- **A Federally qualified subsistence user (recipient) may designate another Federally qualified subsistence user (designated hunter) to take muskoxen on their behalf, unless the recipient is a member of a community operating under a community harvest system. The designated hunter must get a designated hunter permit, and must return a completed harvest report. The designated hunter may hunt for any number of recipients in the course of a season, but have no more than two harvest limits in their possession at any one time; except in Unit 22E where a resident of Wales or Shishmaref acting as a designated hunter may hunt for any number of recipients, but have no more than four harvest limits in their possession at any one time.**
